

Scottish Government

Scottish Government, along with Welsh Government and BEIS, were among the first signatories of the Charter. We held a launch event at the Liberty Dalzell plant in Motherwell, bringing together industry, trade unions and Government to discuss the benefits of the Charter.

Charter Commitments:

In signing the Charter, Scottish Government has committed to the following:

- ✓ Develop a pipeline of future steel requirements in Scotland
- ✓ Require the origin of all steel used in future Scottish Government projects to be provided
- ✓ Advertise clearly all future opportunities for the supply of steel in Scotland
- ✓ Engage early on in projects with steel producers and supply chains
- ✓ Stipulate British steel standards within project requirements
- ✓ Require all tender applications to include supply chain plans

Scottish Government Minister for Trade, Investment and Innovation, Ivan McKee, said:

"I am delighted to sign The Steel Charter for the Scottish Government. It is a great example of the power of public procurement to be good for business, employees and communities in the delivery of our purpose to create a more successful country, with opportunities for all of Scotland to flourish."
